

Commander jetwash terminal

Our stainless steel, floor mounted design results in robustness, user friendliness. Made with state of the art technology. With the full colour interactive 10" TFT screen, electric locking system Savona brings this to the next level in the jetwash industry.

Interactive TFT screen

NFC/MAGNET payment

Robust stainless steel

Coin acceptance

Softtouch buttons

QR loyalty

Ht = 140 cm
55.1 inch

Easy pay solutions

Payments can be done easily with NFC card, magstripe/chip cards. Next to that we created the possibility to have your own loyalty program, being sold in an integrated online webshop. Our customer friendly QR passes can be implemented in the Apple or Android Wallet, with easy access at all times. We even connect existing loyalty programs if preferred.

Commander jetwash terminal by Savona

www.savona.nl

With user friendliness in mind we developed a platform with the aim to connect all equipment present at a full service station. Data can simply be measured and monitored in one web-based dashboard. Easy access login, all data at one secure place with easy-to-read graphs. This makes sense.

Integrated sensors in jetwash equipment. Temperature management, level sensor readings. All shown in Apollo. This will make sure the jetwash has less downtime due to predictive maintenance. This is the jetwash future.

Key operative features:

Pressure security «
Water level «
Air-pressure «
Temperature «
Water usage «
Electricity usage «
Leakage detection «
Water softener «
Osmosis «
Etc. «

Web-based dashboard

Live monitoring

Remote control

Accessories integrated in Apollo

Connect accessories such as vacuum cleaner, perfume spray or vending machines to our Apollo platform and have all data shown in one dashboard. Easy and smart. You name it, we connect it.

- » Vacuum cleaner
- » Waste bin
- » Vending machine
- » Security camera's
- » Light system
- » Perfume system
- » Etc.

All in one platform

Smart data

Easy-to-read graphs

Make-sense monitoring

Very accurate data, shown in presentable graphs. All data displayed per jetwash unit. Usage per program can now be measured. Coin payments, bank payments - all in one overview with remote control.
